

SPAN

Smarter HVAC installs for less with SPAN

SPAN Panel
The smarter electrical panel

Transform your business, empower your customers

Introducing a better, more streamlined approach to installing heating and cooling systems when your customer's home electrical panel or utility service needs to be upgraded.

SPAN Panel helps you solve common electrification challenges with HVAC installs (main panel upgrades, utility-side service upgrades), unlock future electrification projects, and provide smart energy management to your homeowners.

Skip the headaches

Bypass site-specific roadblocks, including utility service upgrades.

Add value to every home

Empower your customers to save money with leading award-winning technology.

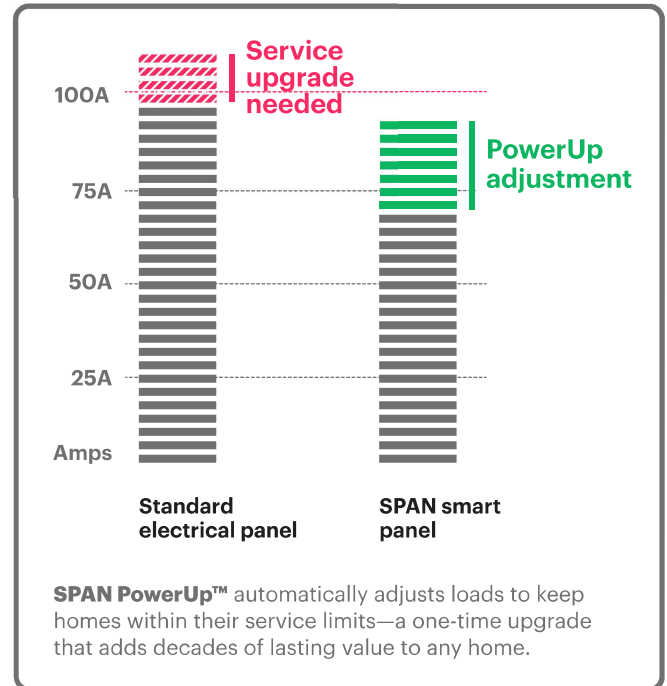

Increase revenue

Become the go-to resource for home electrification projects in your area.

Save time and money

Close deals faster and complete jobs with less third-party disruption.

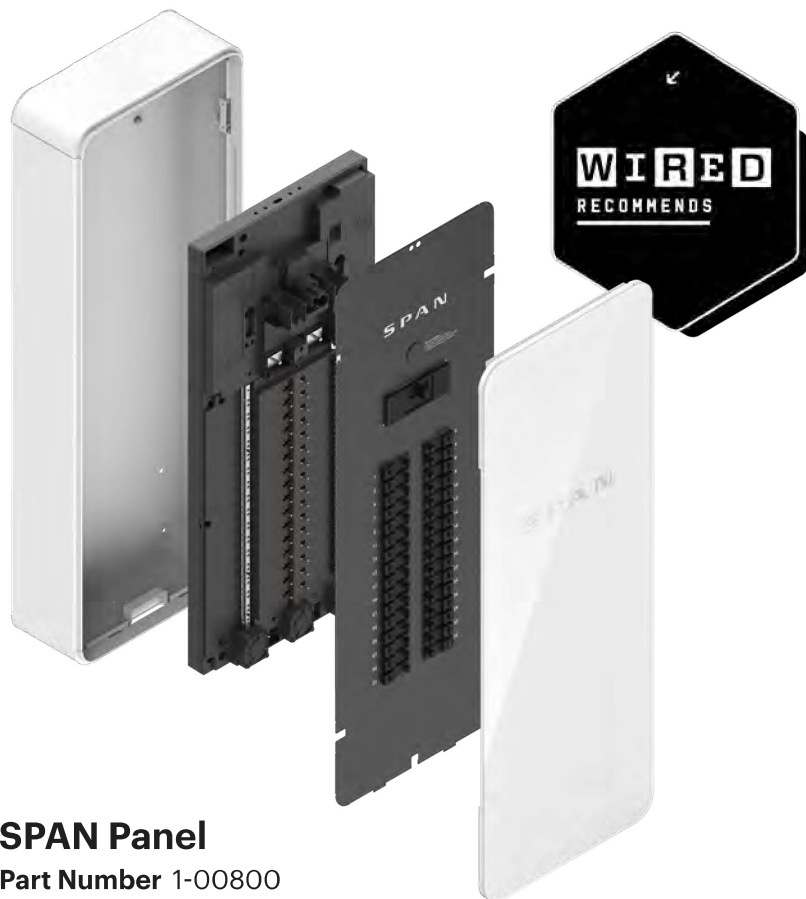

Become a SPAN Authorized Installer™

Scan the QR code to visit the enrollment portal and get started.

“A long-overdue, borderline genius product...”

Unprecedented energy visibility and control across 32 circuits

Reduce wasted energy with next-level data and actionable insights.

Enables flexible home upgrades

Prepare for future energy-efficient upgrades like EV chargers, solar, and battery backup.*

Certified and reliable to the highest standards

Engineered with industry-leading safety standards.
